PROFESSIONAL SUMMARY

Results-driven System/Software Engineer with over 15 years of expertise in developing and delivering high-quality systems in the IT and Networking industry. Highly skilled in SRE and ProdOps methodologies, with a focus on automating solutions for application maintenance, troubleshooting, and testing that significantly enhance operational efficiency and customer satisfaction.

WORK EXPERIENCE

Barclays | March 2022 – Present

Service Manager and SRE Lead

- Led a 20-member Global Fraud Run the Bank team across four major business units (UK, US, Corporate, and Germany) that supports 30 million customers, enhancing fraud detection and identity verification.
- Achieved \$90M savings by replacing an external fraud profiling vendor with an in-house machine learning tool that automates fraudulent payment detection and dispute generation.
- Managed an 8-member GenAI/SRE team to automate change management and incident processes using Python and Ansible.
- Oversaw a 15-member Digital Run the Bank team ensuring optimal performance of Barclays' digital channels through high-severity bug resolution and maintenance deployments.
- Directed a 6-member SRE team to identify production vulnerabilities, facilitating timely solutions that enhanced operational stability.
- Developed multiple automation tools, including a certificate renewal tool integrated with AVX and Jenkins pipeline, streamlining operations and improving efficiency.
- Automated traffic failover between data centers, ensuring continuous service availability during disasters.
- Successfully migrated legacy applications to the OpenShift platform, enhancing application scalability and management.

Tata Consultancy Services (CITI) | August 2015 – February 2022

Cloud Architect

- Built a Cloud Gemfire cluster for stateful APIs and created automated monitoring alerts using Tivoli Tool and Unix scripts.
- Created a DevOps pipeline using Ansible, Python, and Jenkins for seamless deployment of various application components.
- Planned pivotal cloud foundry upgrades and implemented auto-scaling for VMware VMs to optimize resource utilization.
- Conceptualized and built an IBM API infrastructure for Citi, managing API onboarding and rate limits.
- Performed daily health checks on data power nodes, creating monitoring dashboards utilizing Splunk and APPD tool.

Tata Consultancy Services | August 2013 – August 2015

Production Operations Lead

- Provided strategic consultation for service design and implementation in a complex environment of a global bank.
- Managed service life cycles per ITIL methodologies for Incident, Change, Problem, Capacity, Configuration, and Service Improvement.

Tata Consultancy Services | August 2013 – August 2015

Performance Engineer Lead

- Led a team to create performance testing strategies for Online and Mobile Banking serving about 80 million customers.
- Executed multi-application automated load tests for J2EE-based web applications, enhancing performance and user experience.
- Optimized JVM heap usage and overall application performance through performance tuning and analysis.

Tata Consultancy Services | March 2010 – August 2013

System Engineer

- Developed automated monitoring scripts in Python and shell scripts in Unix for daily health checks of production environments.
- Created automated batch jobs for cross-platform file transfers across servers.
- Designed a health tracking website for critical production application monitoring.

EDUCATION

Haldia Institute of Technology • 2005-2009

Bachelor of Technology - BTech in Electrical, Electronics and Communications Engineering

SKILLS

Programming Languages:

Python | Java | SQL

DevOps & Cloud Technologies:

Ansible | Kubernetes | Docker | VMware | AWS | Cloud Foundry

Project Management:

SDLC | ServiceNow

Monitoring Tools:

AppDynamics | Splunk

Others:

Performance Tuning | System Design | Automation

CERTIFICATIONS

Gemfire Administrator | Pivotal Software, Inc. |

VMware Certified Professional 6 - Cloud Management and Automation (VCP6-CMA) | VMware |

AppDynamics Certified Professional | AppDynamics |

Splunk Enterprise Certified Admin | Splunk |

HONORS AND AWARDS

- Fixathon Winner - Citi
- Hacker of the Month - Citi
- Star of the Quarter - Tata Consultancy Services
- Star of the Month - Tata Consultancy Services
